

The Knee Space Unit is designed to mount in a concealed or otherwise ergonomic position, and is available with Momentary Pushbuttons (P1), and Barrel (P2) Key Switch.

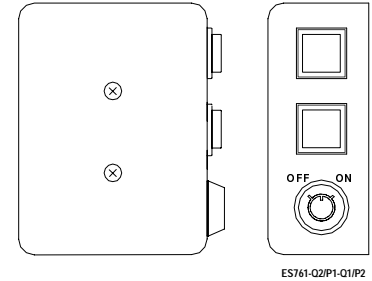

MOUNTING

Remove the two screws to access the mounting points and electrical connections.

Note position of standoffs in relation to final mounting orientation.

Align wiring/conduit access hole with matching hole on mounting surface.

Attach to surface with flathead wood screws (included), using countersunk holes as template.

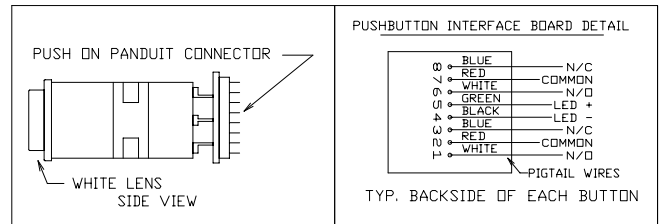

WIRING

See Diagram at right for Pushbutton Wiring information (also: see decal inside unit).

Key Switch -

White pair of wires

OPERATION

Pushbutton and Key Switch contacts change state when operated.
