PRODUCT DESCRIPTION

The remote desktop controller provides an efficient means of interface, allowing easy control of a set of turnstiles. The CRDC's graphics accurately display the layout of the turnstile lanes, providing a visually understandable interface at the security station. It is intuitive and requires no special training to operate. Turnstile alarms and operational conditions are reported by audible and visual means. Standard controller is housed in a sloped top electronics enclosure for ease of use and visability. Customization is available.
